I had 2 phone interviews with Meta, I had a really bad experience with the first one so they scheduled a

In the first interview I was asked :

1. <https://leetcode.com/problems/subarray-sum-equals-k/> (This is where I had the bad experience. O(1) space complexity solution)

In the second interview I was asked :

1. <https://leetcode.com/problems/binary-search-tree-iterator/> (Gave the stack approach)
2. <https://leetcode.com/problems/powx-n/> (Solved in O(log N) time and space)

The second interview went on very well. I got an email from the recruiter saying that they are moving m

Any tips and guidance for the onsite interviews would be greatly appreciated.
